

DIVERTER TUBES

#FightTheFloods

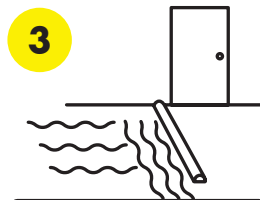

→ QUICKLY ABSORB AND REDIRECT UNWANTED WATER AWAY

1
PLACE UNINFLATED
TUBE IN OR NEAR THE
PATH OF THE FLOOD

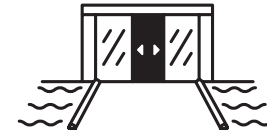

2
IN 1 MINUTE FLOOD
WATER INFLATES TUBE
TO SHAPE

3
TUBE CONTINUES TO
ABSORB WATER AND
DIVERTS THE PATH OF
THE FLOOD

→ Use of the Diverter

Entrance/Exits:

Prevent water making entrance and exit areas dangerous.

Direct Flow:

The flow of water can be diverted and re-directed away from your property to ensure key areas stay dry.

Internal spills:

Isolate an internal water issue by coiling the tube around the wet area.

Wall Mounted Storage:

As it is easy to wall mount with hook and fastener included, the product can be stored at critical areas for rapid deployment.

Co-join:

Each Diverter piece reaches 3m/10' in length and, where necessary, can be joined with another piece, further extending the barrier for protection.

Who is using the product?: Typical purchasers are facility managers in properties such as shopping centres, commercial buildings, hospitals and other areas where maintaining dry areas is essential to safety of occupants.
